Table of Contents

Chapter 1: Introduction **1-1-**

COSMOSFloWorks Introduction 1-1-

Setting Up a COSMOSFloWorks Project 1-2-

Meshing in COSMOSFloWorks 1-2-

Calculation Control Options 1-4-

Inserting Boundary Conditions 1-4-

Choosing Goals 1-5-

Viewing Results 1-7-

Limitations of COSMOSFloWorks 1-7-

References 1-7-

Chapter 2: Flat Plate Boundary Layer **2-1-**

Objectives 2-1-

Problem Description 2-1-

Creating the SolidWorks Part 2-2-

Setting Up the FloWorks Project 2-8-

Selecting Boundary Conditions 2-10-

Inserting Global Goals 2-14-

Running the Calculations 2-15-

Using Cut Plots to Visualize the Flow Field 2-16-

Using XY Plots with Templates 2-17-

Comparison of FloWorks Results with Theory and Empirical Data 2-18-

Cloning of the Project 2-24-

References 2-32-

Exercises 2-32-

Chapter 3: Analysis of the Flow past a Sphere and a Cylinder **3-1-**

Objectives 3-1-

Problem Description 3-1-

Creating the SolidWorks Part for the Sphere.....3-1-

Setting Up the FloWorks Project for the Sphere.....3-9-

Inserting Global Goal for Calculations 3-12-

Running the Calculations.....3-13-

Using Cut Plots 3-15-

Inserting Surface Parameters 3-16-

Theory 3-17-

Cloning of the Project 3-17-

Time-Dependent Calculations 3-18-

Creating the SolidWorks Part for the Cylinder.....3-20-

Setting Up the FloWorks Project for the Cylinder.....3-21-

Inserting Global Goals for Calculations and selecting 2D Flow 3-22-

Tabular Saving.....3-23-

Running Calculations for the Cylinder 3-24-

Using Excel for Frequency Analysis 3-25-

Inserting XY Plots.....3-25-

Strouhal number.....3-27-

Inserting Cut Plots.....3-27-

Animating the Cut Plots.....3-30-

References.....3-32-

Exercises 3-33-

Chapter 4: Analysis of the Flow past an Airfoil.....**4-1-**

Objectives 4-1-

Problem Description 4-1-

Creating the SolidWorks Part 4-1-

Setting Up the FloWorks Project 4-5-

Inserting Global Goals for Calculations 4-8-

Running the Calculations 4-10-

Using Cut Plots 4-11-

Theory 4-12-

Creating a Custom Visualization Parameter 4-13-

Inserting Equation Goal for Calculations 4-16-

Cloning of the Project 4-17-

Creating a Batch Run 4-18-

References 4-19-

Exercises 4-20-

Chapter 5: Rayleigh-Bénard Convection and Taylor-Couette Flow 5-1-

Objectives 5-1-

Problem Description 5-1-

Creating the SolidWorks Part for Rayleigh-Bénard Convection 5-2-

Setting up the FloWorks Project for Rayleigh-Bénard Convection 5-4-

Creating Lids 5-6-

Inserting Boundary Conditions for Rayleigh-Bénard Convection 5-7-

Setting up 2D Flow 5-9-

Inserting Global Goal for Rayleigh-Bénard Convection 5-10-

Running the Calculations 5-10-

Inserting Cut Plots 5-11-

Comparison with Neutral Stability Theory 5-14-

Creating the SolidWorks Part for Taylor-Couette Flow 5-15-

Setting up the FloWorks Project for Taylor-Couette Flow 5-18-

Inserting Boundary Conditions for Taylor-Couette Cell 5-19-

Inserting Global Goal and Running the Calculations for Taylor-Couette Flow 5-21-

Inserting Surface Plots 5-21-

Comparison with Neutral Stability Theory 5-25-

References 5-26-

Exercises 5-26-

Chapter 6: Pipe Flow **6-1-**

Objectives 6-1-

Problem Description 6-1-

Creating the SolidWorks Part 6-1-

Setting up the FloWorks Project 6-5-

Creating Lids for the Pipe 6-8-

Modifying the Computational Domain and Mesh 6-9-

Inserting Boundary Conditions 6-11-

Inserting a Global Goal 6-14-

Running the Calculations for Laminar Pipe Flow 6-14-

Inserting Cut Plots 6-15-

Inserting XY Plots for Laminar Pipe Flow using Templates 6-16-

Theory for Laminar Pipe Flow 6-18-

Running the Calculations for Turbulent Pipe Flow 6-20-

Theory for Turbulent Pipe Flow 6-20-

Inserting XY Plots for Turbulent Pipe Flow using Templates 6-21-

Reference 6-25-

Exercises 6-25-

Chapter 7: Flow across a Tube Bank **7-1-**

Objectives 7-1-

Problem Description 7-1-

Creating the SolidWorks Part 7-2-

Setting up the FloWorks Project 7-4-

Modifying the Computational Domain and Mesh 7-6-

Inserting Boundary Conditions 7-7-

Inserting Global Goals 7-8-

Running the Calculations for Tube Bank Flow.....7-8-

Inserting Cut Plots.....7-9-

Creating Sketch for XY Plots.....7-10-

Theory and Empirical Data.....7-13-

Reference 7-16-

Exercises 7-16-

Chapter 8: Heat Exchanger **8-1-**

Objectives 8-1-

Problem Description 8-1-

Creating the SolidWorks Part 8-2-

Setting up the FloWorks Project 8-10-

Creating Lids 8-12-

Inserting Boundary Conditions 8-14-

Inserting Goals.....8-16-

Running the Calculations for Heat Exchanger.....8-17-

Inserting Surface Parameters 8-18-

Inserting Cut Plots.....8-18-

Effectiveness – NTU Method 8-19-

Reference 8-21-

Exercises 8-21-

Chapter 9: Ball Valve 9-1-

Objectives 9-1-

Problem Description 9-1-

Creating the Ball Valve.....9-2-

Creating the Ball Valve Housing and Pipe Sections.....9-7-

Creating the Ball Valve and Pipe Assembly.....9-11-

Setting up the FloWorks Project for the Ball Valve 9-14-

Creating Lids and Setting the Minimum Gap Size and Number of Cells.....9-15-

Inserting Boundary Conditions 9-16-

Inserting Goals 9-18-

Running the Calculations for Ball Valve 9-18-

Inserting Cut Plots.....9-19-

Determining Hydraulic Resistance 9-20-

Reference 9-22-

Exercises 9-22-

Chapter 10: Orifice Plate and Flow Nozzle 10-1-

Objectives 10-1-

Problem Description 10-1-

Creating the Orifice Plate in a Pipe.....10-2-

Setting up the FloWorks Project for the Orifice Plate 10-6-

Inserting Boundary Conditions 10-7-

Inserting Goals.....10-9-

Running the Calculations for Orifice Plate 10-9-

Inserting Cut Plots.....10-11-

Determining Discharge Coefficient for Orifice Plate 10-12-

Inserting XY Plots.....10-14-

Creating Sketch for XY Plots.....10-16-

Flow Trajectories 10-17-

Running the Calculations for Long Radius Nozzle.....10-18-

Determining Discharge Coefficient for Long Radius Nozzle 10-19-

Reference 10-20-

Exercises 10-20-

Chapter 11: Thermal Boundary Layer 11-1-

Objectives 11-1-

Problem Description 11-1-

Setting up the FloWorks Project 11-1-

Inserting Boundary Conditions 11-4-

Inserting Goals 11-7-

Running the Calculations for Low Reynolds Number 11-7-

Inserting Cut Plots.....11-8-

Plotting Temperature Profiles using Template 11-9-

Theory 11-11-

Plotting Non-dimensional Temperature Profiles using Template 11-11-

Plotting Local Nusselt Number using Template 11-13-

Running the Calculations for High Reynolds Number 11-14-

References.....11-17-

Exercise.....11-17-

Chapter 12: Free-Convection on a Vertical Plate and from a Horizontal Cylinder 12-1-

Objectives 12-1-

Problem Description 12-1-

Setting up the FloWorks Project 12-2-

Inserting Goals 12-6-

Running Calculations 12-6-

Inserting Cut Plots 12-7-

Plotting Temperature and Velocity Profiles using Templates 12-8-

Theory 12-11-

Plotting Non-dimensional Temperature and Velocity Profiles using Templates 12-11-

Plotting Local Nusselt Number using Template 12-14-

Free Convection from a Horizontal Cylinder 12-15-

Animating the Temperature and Velocity Fields for the Cylinder 12-16-

References 12-17-

Exercises 12-18-
