

# PRO/MECHANICA WILDFIRE 2.0 ELEMENTS AND APPLICATIONS SERIES

## PART 2 – STUDIES & CONNECTIONS

*Pro/MECHANICA Mesh of a Sheet Metal Weldment*

**Yves Gagnon, M.A.Sc.**

Professor

Mechanical Engineering Technology  
Okanagan University College

**SDC**

<b>Table of Contents</b>
--------------------------

Preface	i
Acknowledgements	i
About the Author	ii
Files for this Manual	ii
Table of Contents	iii
Introduction	vi
 Exercise 1	
<b>Sensitivity and Optimization Studies</b>	<b>1</b>
Introduction	1
Overview	3
Procedure	4
Preliminary Optimization Work	4
Building the Model and Design Parameters	4
Start Pro/ENGINEER® WILDFIRE	4
Open the Part: notched_flatbar	5
Modifying Dimension Cosmetics	5
Creating Shell Mid-surface Compression	7
Assign Materials	8
Meshing of the Part	9
Assignment of Boundary Conditions to the Model	11
Loads	11
Constraints	11
Create the Static Analysis	14
Quick Check	14
Multi-pass Adaptive Convergence	16
Results of the Static Analysis	17
Procedure	19
Local Sensitivity Study	19
Procedure	33
Global Sensitivity Study	33
Results	38
Optimization Study on Total Mass	41
Procedure	41
Results	43
Conclusion	45
Project 1	46
 Exercise 2	
<b>Spot Welds in Sheet Metal Weldments</b>	<b>51</b>
Introduction	51
Overview	52
Procedure	53
Start Pro/ENGINEER® WILDFIRE	53

Open and Study the Following Parts and Assembly	53
Open the Part cover_panel.prt	55
Activate the Window for the Part cover_sm.prt	56
Activate/Open the Assembly panel_assy.asm	58
Assign Materials	59
Spot Weld Assignments	60
Assign Boundary Conditions to the Model	63
Constraints	63
Loads	65
Generating Elements	67
Create the Static Analysis	68
Quick Check	68
Multi-pass Adaptive Convergence	70
Run the Analysis static_1`	71
Results of the Static Analysis	72
Conclusion	75
Project 2	75
 Exercise 3	
<b>Continuous Welds in Sheet Metal Weldments</b>	77
Introduction	77
Overview	79
Procedure	80
Start Pro/ENGINEER® WILDFIRE	80
Open the Assembly File	80
Mid-surface Plane Creation	81
Mid-surface Plane Creation	84
Modelling the Connection Using the Assembly Mode	85
Create the Weld Connection	87
Assign Materials	90
Meshing of the FEA Model	90
Assign Boundary Conditions to the Model	92
Loads	92
Constraints	94
Create the Static Analysis	96
Results of the Static Analysis	99
Conclusion	102
Project 3	102
 Exercise 4	
<b>Contact Elements and Analysis</b>	103
Objectives	103
Overview	103
Procedure	104
Start Pro/ENGINEER® WILDFIRE	105
Open the Assembly File	105

Pro/MECHANICA Procedure	106
Creating the Contact Connections	106
Reviewing Measures	107
Assign Materials	109
Generating the Mesh	109
Assign Boundary Conditions to the Model	111
Loads	111
Constraints	113
Create the Static Analysis	115
Running the Analysis	117
Results of the Contact Analysis	118
Conclusion	125
Exercise 5	
<b>Buckling Analysis and Failure Mode</b>	127
Overview of the Buckling Theory	127
Euler's Formula	130
Johnson's Formula	130
Buckling Analysis in FEA	130
Buckling Analysis in Mechanica <sup>®</sup>	132
Introduction	132
Objectives	132
Overview	133
Start Pro/ENGINEER <sup>®</sup> WILDFIRE	134
Open the Part compression_rod.pt	134
Assign Materials	135
Meshing of the FEA Model	136
Assign Boundary Conditions to the Model	138
Loads	138
Constraints	139
Create the Static Analysis	141
Static Analysis	141
Results of Static and Buckling Analyses	145
Results of Static Analysis	146
Results of Buckling Analysis	148
Conclusion	149
