Chapter 1

Introduction

Introduction	1-2
Development of Finite Element Analysis	1-2
FEA Modeling Considerations	1-3
Types of Finite Elements	1-4
Finite Element Analysis Procedure	1-6
Matrix Definitions	1-6
Getting Started with I-DEAS	1-9
I-DEAS Data Management Concepts	1-9
Starting I-DEAS	1-11
I-DEAS Screen Layout	1-13
Mouse Buttons	1-14
Icon Panel	1-15
Prompts	1-16
Lists	1-16
Quick Help	1-16
Icon Operation	1-17
Leaving I-DEAS	1-17
Questions	1-18

Chapter 2

The Direct Stiffness Method

Introduction	2-2
One-dimensional Truss Element	2-3
Example 2.1	2-5
Example 2.2	2-7
Basic Solid Modeling using I-DEAS Master Modeler	2-10
The Adjuster Block Design	2-10
Starting I-DEAS	2-10
Units Setup	2-11
Step 1: Creating a rough sketch	2-12
Graphics Cursors	2-13
Dynamic Navigator	2-13
Dynamic Viewing Functions	2-16

Basic Editing – Using the Eraser	2-17
Creating a Single Line	2-18
Consideration of Design Intent	2-19
Step 2: Apply/Delete/Modify constraints and dimensions	2-20
Creating Desired Dimensions	2-21
Modifying Dimensional Values	2-22
Pre-selection of Entities	2-24
Step 3: Completing the Base Solid Feature	2-26
Display Viewing Commands	2-27
Display Icon Panel	2-27
View Icons	2-28
Workplane – It is an XY CRT, but an XYZ World	2-30
Workplane appearance	2-31
Step 4: Adding additional features	2-34
Step 4-1: Adding an extruded feature	2-35
Step 4-2: Adding a cut feature	2-38
Extrusion – Cut option	2-40
Save the Part and Exit	2-41
Questions	2-42
Exercises	2-43

Chapter 3

Two-Dimensional Truss Element

Introduction	3-2
Truss Element in Two-Dimensional Spaces	3-2
Coordinate Transformation	3-5
Example 3.1	3-9
Global Stiffness Matrix	3-10
Example 3.2	3-13
Questions	3-19
Exercises	3-20

Chapter 4

I-DEAS Two-Dimensional Truss Analysis

Finite Element Analysis Procedure	4-2
Problem Statement	4-3
Preliminary Analysis	4-3
Starting I-DEAS	4-4
Units Setup	4-5
Create a FE Model	4-5
Workplane Appearance	4-6
Creating Node Points by Entering Coordinates	4-7

Making Copies of Node Points	4-9
Material Property Table	4-10
Setting Up an Element Cross Section	4-11
Creating Elements	4-12
Applying Boundary Conditions	4-14
Applying External Loads	4-16
Running the Solver	4-18
Viewing the Results	4-20
Questions	4-25
Exercises	4-26

Chapter 5

Three-Dimensional Truss Analysis

Three-Dimensional Coordinate Transformation Matrix	5-2
Stiffness Matrix	5-3
Degrees of Freedom	5-3
Problem Statement	5-5
Preliminary Analysis	5-5
Starting I-DEAS	5-7
Workplane Appearance	5-8
Creating Node Points	5-9
Material Property Table	5-11
Setting Up an Element Cross Section	5-12
Creating Elements	5-13
Applying Loads and Boundary Conditions	5-16
Running the Solver	5-18
Viewing the Results – Axial Forces	5-20
Viewing the Results – Stresses	5-23
Questions	5-25
Exercises	5-26

Chapter 6

Basic Beam Analysis

Introduction	6-2
Modeling Considerations	6-2
Problem Statement	6-3
Preliminary Analysis	6-3
Starting I-DEAS	6-6
Workplane Appearance	6-7
Creating Node Points	6-8
Making Copies of Node Points	6-9
Material Property Table	6-10

Setting Up an Element Cross Section	6-11
Creating Elements	6-12
Apply Boundary Conditions	6-15
Concentrated Force	6-17
Distributed Load	6-18
Running the Solver	6-19
View the Results – Reaction Forces	6-21
What Went Wrong?	6-23
Correct the Mistake	6-23
Run the Solver	6-25
View the Results – Reaction Forces	6-26
Shear Diagram	6-28
Moment Diagram	6-31
Questions	6-33
Exercises	6-34

Chapter 7

Beam Analysis Tools

Introduction	7-2
Problem Statement	7-2
Preliminary Analysis	7-3
Stress Components	7-4
Starting I-DEAS	7-6
Workplane Appearance	7-7
Using the Create Part option	7-8
Creating a Wireframe Model of the System	7-8
A CAD Model is NOT an FEA Model	7-10
Creating an Element Cross Section	7-10
Setup of an FEA Model Name	7-11
Material Property Table	7-12
Define Beam Auto-Mesh	7-13
Create Beam Auto-Mesh	7-14
Create a Coordinate System for the Inclined Support	7-15
Node Orientation Alignment	7-17
Apply Boundary Condition	7-18
Apply Boundary Condition for the Inclined Support	7-19
Distributed Load	7-20
Running the Solver	7-22
View the Results – Reaction Forces	7-23
Z Bending Moment Diagram	7-27
Axial Load Diagram	7-29
Shear Diagram	7-30
Maximum Normal Stress in the Member	7-31
Questions	7-33
Exercises	7-34

Chapter 8

Statically Indeterminate Structures

Introduction	8-2
Problem Statement	8-3
Preliminary Analysis	8-3
Starting I-DEAS	8-6
Workplane Appearance	8-7
Using the Create Part option	8-8
Creating a Wireframe Model of the System	8-8
Creating an Element Cross Section	8-10
Setup of an FEA Model Name	8-11
Material Property Table	8-11
Define Beam Auto-Mesh	8-12
Create Beam Auto-Mesh	8-14
Checking Coincident Nodes	8-15
Apply Boundary Conditions	8-16
Apply external Loads	8-17
Build a Boundary Condition Set	8-18
Running the Solver	8-19
View the Results – Reaction Forces	8-20
View the Results – Reactions at Point A	8-21
Shear Diagram	8-24
Z Bending Moment Diagram	8-26
Maximum Bending Stress in the Member	8-27
Questions	8-29
Exercises	8-30

Chapter 9

Two-Dimensional Solid Elements

Introduction	9-2
Problem Statement	9-3
Preliminary Analysis	9-3
Considerations of Finite Elements	9-5
Starting I-DEAS	9-6
Workplane Appearance	9-7
Using the Create Part option	9-8
Creating a CAD Model of the system	9-9
Add Dimensions	9-10
Extrusion	9-11
Create a Cut Feature	9-12
Geometric Based Analysis	9-16
Apply Boundary Conditions	9-17
Apply the External Loads	9-19

Boundary Condition Set	9-20
Material Property Table	9-21
Define Auto-Mesh	9-21
Create the Mesh	9-22
Define the Thickness of the Elements	9-23
Run the Solver	9-24
View the Results	9-25
Delete the Solution Set and the Mesh	9-28
Refining the Mesh– Method 1: Free Options	9-29
Create the Mesh	9-30
Delete the Solution Set and the Mesh	9-31
Refining the Mesh– Method 2: Define Free Local	9-32
Questions	9-34
Exercises	9-35

Chapter 10

Three-Dimensional Solid Elements

Introduction	10-2
Problem Statement	10-3
Preliminary Analysis	10-4
Starting I-DEAS	10-7
Workplane Appearance	10-8
Creating a CAD Model using the Sweep command	10-10
Rounded Corners – 2-D Fillets	10-11
Define the Sweep Section	10-14
Create a Swept Feature	10-16
Adding Additional Features	10-18
Extrusion- Cut option	10-19
Completing the CAD model	10-20
Setup of an FEA Model	10-21
Apply Boundary Conditions	10-22
Apply the External Loads	10-23
Define Auto-Mesh	10-25
Create the Mesh	10-26
Run the Solver	10-27
View the Results	10-28
Conclusion	10-31
Questions	10-32
Exercises	10-33
